

FACILITIES MAINTENANCE

Centralize your data to improve operational efficiencies and improve team communication. By using 360Facility to automate your work order process, you can cut your maintenance costs by 35%.

ASSET MANAGEMENT

Capture all data related to your assets and sync with available parts to simplify the repair process. With more than two million assets tracked in 360Facility on a daily basis, keep your data in a secure location trusted by thousands of companies around the world.

VENDOR MANAGEMENT

Seamlessly communicate with vendors by enabling secure access to the system, which can be accessed from any Internet-enabled mobile device. Create rating systems to make quick, data-driven decisions about top vendors.

REPORTING AND ANALYTICS

Gain real-time insight into your team's performance through interactive dashboards. Generate reports to understand resource use and track against service-level agreements to measure success.

360 Facility

In a world where you must do more with less, you need a technology partner that can help your team work smarter, not harder. 360Facility is designed to help you save time, cut costs and ultimately, improve operational efficiencies. See why 360Facility serves as the industry-leading true cloud software solution to manage more than four billion square feet in 120 countries.
