

Secure, Simplified Access Across the Accruent Portfolio

A Modern Identity Experience for Accruent Solutions

Accruent's innovative technology solutions and products are built on a modern identity platform powered by Auth0 to deliver a more secure, streamlined and consistent user access experience across its portfolio.

This approach helps organizations simplify authentication, strengthen security and reduce the administrative burden of managing user access while creating the foundation for a more connected Accruent experience.

How the Modern Identity Platform Supports a Connected Future

A common identity platform is an important step toward creating more seamless experiences across the Accruent portfolio, delivering greater consistency and security while providing a scalable foundation for future innovation and advanced workflows.

Simplified User Access

Provides a more consistent login experience across Accruent solutions, helping users get into applications faster and remain productive.

Enterprise-Grade Security

Meets modern security requirements with capabilities such as Single Sign-On (SSO), Advanced Multi-Factor Authentication (MFA), integrating with corporate identity providers and centralizing authentication controls.

Reduced Administrative Effort

Helps IT teams streamline user access management, simplifying onboarding and offboarding, and reducing support requests related to user authentication.

What This Means for You

Organizations can be confident that Accruent's technology platform is built on a modern identity foundation designed to:

- ✓ **Support** enterprise-ready identity, security and compliance
- ✓ **Reduce** complexity for user administration
- ✓ **Simplify** user and access management
- ✓ **Lower risk** associated with password management and access control
- ✓ **Provide** a consistent experience across the Accruent ecosystem
- ✓ **Deliver** a scalable foundation for future innovation
