

Empower Your Workforce, Anywhere, Anytime:

8 REASONS TO GO MOBILE WITH MAINTENANCE CONNECTION

Across industries, the asset management landscape is demanding. To keep pace with a digital-first, mobile-enabled workforce is essential.

Maintenance teams on the plant floor need tools that are as dynamic and agile as they are. That's where MC Kinetic, Maintenance Connection's mobile app, comes in.

MODERNIZE. MOBILIZE. MANAGE MAINTENANCE SMARTER.

MC Kinetic empowers technicians to execute work anytime, anywhere—even without internet connectivity. By enabling true mobile freedom, it drives efficiency, improves asset uptime, and modernizes operations for the data-driven era.

WORK ANYWHERE—EVEN OFFLINE

Stay productive in any environment. MC Kinetic saves tasks locally and syncs automatically when back online, so your team never misses a beat.

KNOW WHAT NEEDS TO BE DONE—AT A GLANCE

Get personalized, prioritized views of daily tasks, enabling technicians to focus on what matters most.

SMARTER, STREAMLINED WORKFLOWS FOR TECHS

Enhance task execution with built-in features like photo capture, barcode scanning, parts tracking, time logging and digital signatures.

SIMPLIFIED TASK MANAGEMENT

By organizing records into tailored workbenches, technicians can quickly locate, filter and act on critical work orders, supporting faster decision-making.

SUPERIOR PERFORMANCE

With local data storage, MC Kinetic provides faster response times than web-based tools, giving technicians instant access to the tools and info they need and take proactive actions to save time.

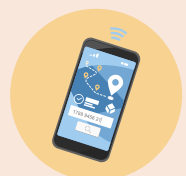

SEAMLESS USER EXPERIENCE

Enjoy a native app experience on iOS and Android, complete with interactive worklists, asset search and map-based navigation.

BOOST ADOPTION IN THE FIELD

Meet your team where they are—in the field. MC Kinetic's mobile-first design seamlessly integrates into daily routines, encouraging greater system usage and accuracy.

LEVERAGE CONTINUOUS INNOVATION

With regular updates and new features, your team will benefit from the latest in mobile CMMS technology.
