Power Analytics and Reporting with Direct Access to Structured Cloud Data

Across industries, organizations struggle to access, unify and prepare operational cloud data for reporting and analytics. Manual exports, API limitations, custom scripts and unreliable integrations, slow reporting and hinder the ability to scale analytics and AI initiatives.

Accruent Data Connect, gives teams direct, secure access to business intelligence (BI)-ready operational data. By providing a structured, governed data layer that integrated seamlessly with BI and enterprise systems, organizations can minimize manual data prep, reduce reliance on APIs and unlock faster, more reliable insights across the business.

Trusted, Actionable Data
Access structured, governed and purpose-built datasets, that ensure accurate, consistent reporting and analytics.

Faster, More Confident Decisions
Leverage clean, unified data with minimum workarounds to act quickly on reliable KPIs and insights.

Simplified Data Workflows and Governance
Reduce manual exports, API reliance and custom integrations to simplify data modeling and accurate analysis, without heavy dependance on IT or data experts.
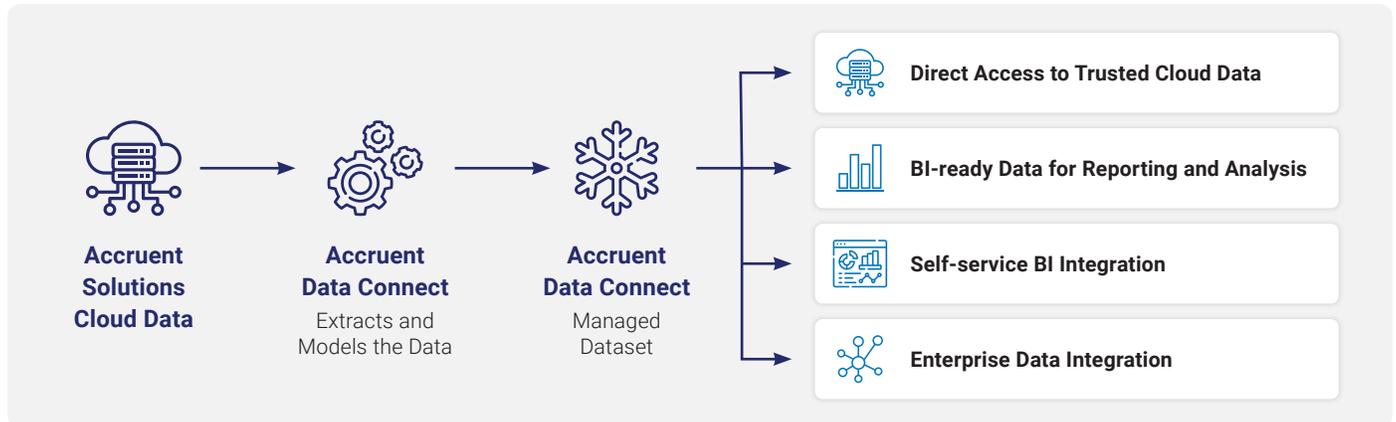

Stronger Enterprise Performance
Scale reporting and analytics without impacting operational systems, while integrating seamlessly with BI tools and enterprise platforms.

ACCRUENT

Turning Data into Actionable Insights

Accruent Data Connect extracts and models Accruent cloud solutions data to deliver a managed, BI-ready cloud dataset. By unifying data and simplifying across BI, reporting and enterprise integrations, teams gain faster insights while minimizing API limitations and manual effort.

- **Cloud Data Extraction:** Accruent Data Connect extracts data directly from Accruent cloud solutions, providing a reliable foundation for analytics and reporting.

- **Data Modeling and Structured Datasets:** Accruent Data Connect models extracted data into curated, organized and easy-to-manage datasets. This standardizes data structures, applies consistent business logic and delivers governed datasets ready for reporting and analytics.

- **BI-Ready Data Delivery to an Advanced Data Platform:** The BI-ready dataset is delivered to an advanced data platform, enabling direct access or seamless integration with BI tools. Teams can query, analyze and validate data for reporting while simplifying integration with broader enterprise systems for a holistic data view.

- **Outcomes and Business Value:** The result is reliable, structured data ready for analysis and reporting, with self-service BI integrations. By supporting enterprise-level analytics and integration with broader system data, Accruent Data Connect provides a strong foundation for predictive insights and AI-driven initiatives.
