

Cloud Is the Backbone of Modern Operations

As costs increase and downtime risk grows, IT teams are turning to the cloud to improve performance, minimize risk and scale with speed.

Cloud Solutions Trusted by Leading Organizations Worldwide

Accruent’s cloud solutions power organizations across industries:

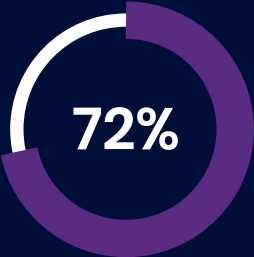

"Moving to the cloud is a no-brainer. Any updates and patches that need to happen are done automatically, and the backups of the data are there. You do not have to worry about losing that information. It just makes sense from having reliable storage and constant updates, so you know your software is always running at full capacity."

- Mark Venhuizen, Director of Operations and Event Services, South Dakota State University

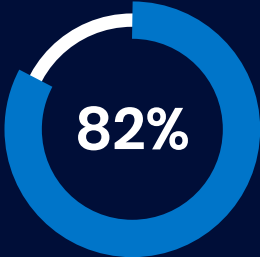

Cloud Has Become the Industry Standard

of enterprises use cloud software¹

of core operations are hosted in the cloud¹

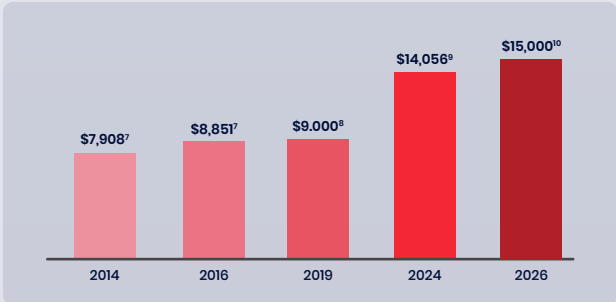

of organizations report cost savings from the cloud²

On-Premises Costs Are Rising

\$50K-\$500K
annually in infrastructure, maintenance and overhead³

Up to 40%
of total operational expenditure go to maintaining legacy on-premises systems⁵

Hardware requires replacement
Every 3-5 years⁴

Downtime cost per minute have increased more than 89% from 2014-2026

Organizations experience an average of 14 hours of unplanned downtime per year⁶, putting operations, revenue, and customer trust at risk.

Cloud Reduces Cost Pressure

- Eliminate** hardware and maintenance overhead
- Automate** updates and remove upgrade cycles
- Scale** infrastructure without capital investment
- Enable** a modern tech stack, including AI and Data-as-a-Service (DaaS)

"There's a sense of relief that now if something occurs in the system, we have protections in place."

- Laurel Kadouri, General Manager, Coral Lakes Association

Cloud Migration, Simplified

We configure your solution to fit your needs, without the friction.

We Handle the Heavy Lifting
Simplify your move to the cloud, from initial backup to the final login.

Deliver a Turnkey Cloud Database
Give users a seamless transition—just a new login URL and a more modern experience.

Cloud Migration is Faster Than You Think

2 Weeks
Typical time to migrate¹¹

5 Hours
Average customer time invested¹¹
